

## REMARKS

Claims 3-118 were in the application and indicated as allowable, subject to an obviousness-type double patenting rejection. Applicant herein is correcting certain informalities noted in the previously submitted claims, and also clarifying the claims in certain regards. Applicant also is adding new claims 119-124 to more fully claim Applicant's invention.

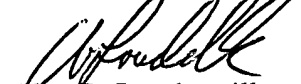

As for the obviousness-type double patenting rejection, Applicant is submitting a terminal disclaimer over other of Applicant's patents, which should obviate the double patenting rejection. Applicant also notes that it reviewed the list of patents cited by the Examiner and also independently reviewed Applicant's patents, and as a result Applicant added additional patents to the list of disclaimed patents in the terminal disclaimer.

No new matter has been added. All claims are submitted to be in condition for allowance, and such is respectfully requested.

If there are any questions regarding this amendment, Applicant's attorney requests an opportunity to discuss such questions with the Examiner by way of a telephone interview. It is submitted that the foregoing amendments should position the application in condition for allowance, and such is respectfully requested.

Please charge any additional fees due, or credit any overpayment, to Deposit Account No. 50-0251.

Respectfully submitted,

Alan R. Loudermilk
